

# Manufacturing as a Service

**Parts. Products. Production.**

RVC Supply Chain Solutions is a trusted provider of innovative supply chain solutions. The company, headquartered in Pune has a Manufacturing and Development center at Belagavi and **13 warehouses at strategic locations across India.**

Our team of experienced professionals have a proven track record in helping businesses across various industries achieve their goals in **prototyping, product development and timely procurement.**

We offer manufacturing as a service. It includes prototyping, bulk manufacturing, export of components and products. Our supply chain network and workforce management abilities help us to scale up quickly and deliver products as per schedule. Because of this competence, **our customers get advantage of cost and flexibility, timely delivery and good quality.** Raw as well as finished Castings, Forgings, machined components, and complete production services are on offer.

## **Our Services**

Leverage our global network, advanced technology, and agile manufacturing capabilities for cost-effective, high-quality production-whenver you need it.

- **Turnkey Manufacturing Solutions**  
From concept to completion, we take full responsibility for your product, ensuring seamless production and quality control.
- **Prototyping & Product Development**  
We bring your ideas to life with precision-engineered prototypes that meet industry standards.
- **Machining & Component Manufacturing**  
Our expertise covers CNC machining, castings, forgings, fabrications, and more-tailored to your specifications.
- **Sourcing & Procurement**  
We source high-quality materials, including steel, alloys, rubber, plastics, and industrial components, ensuring cost-effective solutions.
- **Supply Chain & Logistics Support**  
From supplier identification to global shipment management, we handle the complexities of procurement and delivery.

## Why RVC?

### On-Demand Manufacturing –

Scale production up or down as per demand with our MaaS model.

### Customization & Flexibility –

We adapt to your specific requirements for tailored solutions.

### Quality & Cost Optimization –

We deliver premium-quality products at competitive prices.

### Efficiency & Speed –

Our streamlined processes ensure timely delivery and reduced operational costs.

### Risk Management & Compliance –

We ensure supplier compliance and rigorous quality checks.

## Development & Manufacturing Centre: Belgavi

Our Development & Manufacturing Centre is a well equipped facility designed to foster innovation, collaboration & efficiency. This hub can design, develop test and manufacture products.

We have helped companies with their import substitution projects, reducing dependency on foreign suppliers fostering local industry growth while ensuring cost efficiency and supply chain reliability.

For all your requirements of CNC/VMC machining, Laser cutting and bending, casting, forging, or any other manufacturing process, we have the expertise and the resources to meet your requirements.

## Case Study

### Optimizing Manufacturing for Pressure Relief Products

A global engineering company specializing in pressure relief solutions faced high material and transportation costs in Asia. To reduce expenses while maintaining high precision and quality, the company explored local manufacturing options. After a thorough evaluation, certified vendors in India were selected to produce holding arrangements for their pressure relief devices. This facility is inspected annually and a "Authorized manufacturing facility" certification has been issued.

#### Key Benefits Achieved:

##### Material Cost Savings

Local raw material sourcing with certifications

##### Reduced Freight & Customs Costs

Eliminate international shipping expenses

##### Lower Labor Costs

Cost-effective skilled workforce in India

##### Capacity Expansion

Increased output at optimized costs

##### Improved Lead Times

Faster production and delivery cycles

##### Global Competitiveness

More competitive pricing for projects worldwide
